EDUCATION

De La Salle University – Manila

Bachelor of Science in Computer Science, Major in Software Technology

Manila, Philippines

2022 – Dec 2026 (*Expected*)

EXPERIENCE

InterAsia Outsource, Inc.

Manila, Philippines

Software Engineer Intern → Project-Based Software Engineer

May 2026 – Present

- One of two engineers who launched Bill&Pay from zero: codebase setup, schema design, wireframes/mockups, requirements gathering, stakeholder demos, QA.
- Owned Workers, Clients, Billing, and Timesheets end to end, including spreadsheet/PDF import-export formats.
- Retained post-internship on contract: expanded to system administration, document-ingestion pipelines, and app-wide bug fixing outside payroll.
- Sole developer of grade-code feature mapping positions to client grade codes, safeguarding downstream billing and payroll accuracy (in progress).

PROJECTS

Bill&Pay – Billing & Payroll Platform | *Next.js, TypeScript, Prisma, PostgreSQL, Supabase* | *InterAsia Outsource, Inc.*

- Built the Workers, Clients, Billing, and Timesheets modules end to end, with spreadsheet/PDF import-export formats and styled XLSX/PDF billing exports (management-fee %, VAT/WHT logic).
- Built preview-confirm spreadsheet ingestion (timesheets, mandays, advances) with fuzzy worker matching and conflict detection, plus system-admin tooling and document-ingestion pipelines.
- Now taking over the teammate-built payroll module to land the grade-code feature without disrupting billing and payroll outputs.

May Reviewer – AI Exam Generator | *Next.js, TypeScript, Gemini, Mistral, Supabase* | mayreviewer.vercel.app | github.com/yuriolvrs/mayreviewer

- Built notes-to-exam app with multimodal pipeline (PDF/DOCX/images, 10 files up to 40MB) on Gemini (Mistral fallback on generation), including AI format inference from past exams.
- Flexible quiz engine (immediate/end-only feedback, scope-by-type, reshuffled retakes, attempt history) with portable JSON/ZIP reviewer export/import.
- Added Supabase Auth (email/Google) with cloud sync of reviewers, history, and settings over local-first storage; rate limits, prompt-safety validation, Vitest + Playwright coverage.

Dovetailed – Job Application Assistant | *React, TypeScript, Cloudflare Workers, Groq, IndexedDB* | dovetailed.pages.dev | github.com/yuriolvrs/dovetailed

- Shipped live job-to-tailored-resume app on React + TypeScript; Cloudflare Worker proxies generation to Groq's GPT-OSS 120B, persistence in IndexedDB.
- End-to-end workflow: posting analysis, dual generation routes (per-requirement vs. holistic), application tracker, deterministic LaTeX export, Mistral-OCR import.
- Hallucination-resistant generation: every bullet traces to profile evidence via sourceMap; unevidenced claims flagged, never fabricated.

LEADERSHIP

Viridis Arcus Esports

De La Salle University – Manila

Assistant Director for Internals (prev. Junior Officer)

Jun 2024 – Aug 2026

- Led community events, tournaments, and general assemblies as project head, coordinating fellow officers across internal teams.
- Managed organizational documentation including event proposals and post-event reports.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C/C++, HTML/CSS, SQL | **Frameworks:** Next.js, React, Node.js, Tailwind CSS, Prisma | **Data & Infra:** PostgreSQL, Supabase, Cloudflare Workers/Pages, Vercel, GitHub Actions | **Tools:** Git, Docker, Vitest, Playwright, Tesseract OCR
